With approximately five years of experience as a React developer, specialize in crafting user-friendly web applications that seamlessly merge technology with design. I excel in optimizing code for performance and ensuring smooth user experiences. My proven track record includes leading development teams and delivering high-quality, visually appealing products on time and within budget.

Work Experience

Full-Stack Developer, full-time　　　　**ProCredit Bank**　　　　　　　**Mar 2024 — Present**
Frontend + Backend　　　　　　　Sarajevo, Bosnia and Herzegovina

- Worked in a team on projects like FeedBackApp, ProClients, MemberGetMember and Ultimate HR Dashboard
- Agile development with daily syncs and sprint planning.
- Frontend (Bootstrap, Material and Vuetify) + Backend (Python Flask, SQLite, PHP Laravel and MySQL)
- I have taken the lead in the comprehensive development of projects, encompassing design, creation, implementation, testing, and deployment.

Senior Frontend Developer, part-time　　**Arkona Technology**　　　　**Oct 2024 — Mar 2025**
Frontend team　　　　　　　　　Belgrade, Serbia

- Led the end-to-end development of Arkona Technology's website, transforming designs into a responsive, high-performance user experience.
- Enhanced user engagement by 20% through improved UI/UX design.

React + AI Engineer, contractor　　　　**Superlex**　　　　　　　　**Feb 2024 — May 2024**
Frontend lead　　　　　　　　　Switzerland

- Key features include: Login and Registration, Email and Phone Verification, Dashboard, ChatGPT Integration, File Upload
- Superlex delivers reliable and efficient legal advice, leveraging the latest AI technology to ensure high security and user satisfaction.
- Enhanced satisfaction via a user-friendly dashboard interface

React Developer, contractor　　　　　**Bloola GmbH & Co. KG**　　　**Sep 2021 — Nov 2023**
Frontend team　　　　　　　　　Gevelsberg, Germany

- Worked in a team of dedicated developers on projects like BMW and Deutsche Bundesbank
- Agile development with daily syncs and sprint planning.
- Frontend design with Custom and MUI components for great-looking UX/UI.

React Developer, contractor　　　　　**ACKE Creative Studio**　　　**May 2023 — July 2023**
Frontend team　　　　　　　　　Ilijas, Bosnia and Herzegovina

- Was completely involved in the process of planning and developing a web-based dashboard app.
- Frontend made with Material UI, Style, and Custom components.

Software Developer Intern　　　　　　**Solution404**　　　　　　　**Jan 2021 — Sep 2021**
Sarajevo, Bosnia and Herzegovina

- Learned about React development ecosystem.
- Worked full-stack on the MyLawyer app and designed the Mine Tracking app from top to bottom
- I increased the conversion rate of our e-commerce app by 11%, according to my suggestions.

Education and Certifications

- **B.Sc. Computer Science,** International Burch University,   **2019 – 2023**

  Faculty of Engineering and Natural Sciences, Sarajevo.

- **Faculty of Information Technologies,** Mostar, Bosnia and Herzegovina.   **2017 – 2019**
  University "Dzemal Bijedic", Mostar

- **Electrical technician of computer science and informatics,** Sarajevo, Bosnia and Herzegovina.   **2013 – 2017**
  Secondary School of Electrical Engineering, Sarajevo

Technologies and Languages

- **Programming Languages:**   JavaScript, TypeScript (ES6+)
- **Frameworks & Libraries:**   React, React Native, Next.js, Vue 3 (Composition API), MUI,
  Style Components, ChakraUI, Tailwind CSS, shadcn/ui, Vuetify
- **State Management:**   Redux Toolkit, Zustand, React Query, Formik, Vuex
- **Backend Technologies:**   Python (Flask), PHP (Laravel), Node.js, Express, RESTful APIs, GraphQL,
  Microsoft SharePoint
- **Databases:**   MySQL, PostgreSQL, MongoDB (Firebase, Supabase, SQLite)
- **Version Control & Collaboration:**   Git (GitHub, GitLab), Bitbucket, Jira, Figma, Sketch
- **Additional Skills:**   CI/CD pipelines, Docker

Spoken Languages

- **English - Professional**
- **German - Intermediate**
- **Bosnian / Serbian / Croatian - Native**

Projects

- **Ultimate Dashboard**: Ultimate HR Dashboard is a comprehensive human resources management application developed using Vue 3 Composition API, Vuex, and Vuetify, with a backend powered by Laravel and MySQL. The application is designed to streamline HR processes, offering features such as vacation booking, a vacation calendar, vehicle reservation, and IT equipment management. My role involved contributing to the development of a user-friendly interface that integrates these functionalities, ensuring seamless data flow and user experience across the platform. The solution has been instrumental in improving HR operational efficiency for our employees.
- **FeedBack PRO**: FeedbackPro is an advanced application designed to enhance user experience and efficiently address issues related to ATMs. It provides users with a simple and intuitive way to give feedback, report problems, and suggest improvements. The aim of the application is to enable faster bank responses to ATM issues, improve customer support, and ensure a better experience for all users.
- **MemberGetMember:** MemberGetMember is a revolutionary solution that redefines how banks manage new customers. With a simple yet effective process, it allows banks to easily track and reward users, leading to enhanced service and an increased customer base. Through this program, banks can build stronger relationships with existing customers and encourage them to become brand ambassadors, ensuring continuous growth and customer satisfaction.
- **Bloola CM**: Bloola Contract Management was an application designed to offer user-friendly contract creation, tracking, and analysis. It was also designed as a Microsoft Teams application and integrated into Teams. It was meant to be used to enhance compliance and operational efficiency for informed decision-making. Together with the team, I helped the client to deliver the app from design to working and functional product.
- **Bloola Factory:** Bloola Factory was a drag-and-drop solution for creating small web applications without needing prior coding knowledge. As part of the team worked on the frontend part of the Factory app, enabling the client to deliver a stable working solution.
- **Project Planner:** Project planner is an application that shows an aggregation of all progress/deliveries for ongoing projects, identifies problems, and initiates actions to solve those problems. Clients using the app saw an increase in productivity and decrease in project downtimes.
- **Travel App:** Travel app was a travel planning app, that gave the starting point and destination calculated and presented to the end user all costs of travel, including tolls and other expenses based on the selected method of travel. It also featured cost-splitting functionality.
- **BMW My Learning Finder:** An application for BMW Learning Center, where users could search courses available on the learning platform, get information about a course, and watch it. Together with the team implemented React frontend solution connected to Sharepoint database.
- **BDM Network:** BDM Network was a web-based dashboard application that featured adaptable variations based on user needs to deliver a personalized user experience. It was tailored to the needs of the music industry, mainly music producers. Working closely within a small team and with the product owner, we helped the client deliver the app from the design and planning phase to working and stable MVP in under three months.
- **Porsche Smart Driver App:** Porsche Smart Driver was a Flutter smart driver assistance app, developed to collect data from the vehicle and present them to the driver. It was developed for a successful insurance client. My task was to help the existing development team implement Bluetooth functionality to improve the app's usability.
