Sarajevo, Bosnia & Herzegovina · Remote

I've been building software professionally since 2021, from Sarajevo, for teams in Germany, Switzerland, the UK, Luxembourg and the US. My center of gravity is frontend architecture: React, Vue 3, TypeScript, Next.js, backed by real backend work in Laravel, Flask and Node. I lead the report-builder application on LibLynx, the identity and analytics platform used by PLOS, The Economist Group and Digital Science. I'm CTO at DIN Solution, an international FinTech consulting firm, and one of the four members of Neo Labs, where I engineered the customer-facing platforms of two AI voice products. Before that: internal banking products at ProCredit Bank, two years at Bloola on BMW and Deutsche Bundesbank projects, AI integrated into a Swiss legal-tech product, and a dApp shipped on Sui.

EXPERIENCE — 2021 → NOW

2026 — now — **DIN Solution · CTO & Head of Software Development** (London / Luxembourg / US · remote)
Technology direction and the software development function of an international FinTech consulting firm, including delivery behind its IT-solutions service line.

2025 — now — **Neo Labs · Head of Communications & Software Innovation** (EU · remote)
One of the company's four members. Engineered the customer-facing platforms of its AI voice products, Neo Care and Neo Therapy, and own how the products are built and communicated.

2025 — now — **LibLynx via Clearview · Senior Frontend Developer → Lead Software Developer** (Remote · remote)
Joined the LibLynx development team through Clearview as Senior Frontend Developer; promoted to Lead in October 2025. Lead development of the platform's report-builder application.

2024 — 2025 — **Arkona Technology · Senior Frontend Developer** (Belgrade · part-time)
Led end-to-end development of Arkona's website; built the GumaMax multi-vendor tire-ordering dashboard.

2024 — 2025 — **ProCredit Bank · Full-Stack Developer** (Sarajevo · on-site)
Design-to-deployment ownership of internal banking products: HR dashboard, customer-referral system, ATM-feedback tooling.

2024 — **Superlex · React + AI Engineer** (Switzerland · contract)
Built auth, verification, dashboard and file-upload features for an AI legal-advice product with ChatGPT integration.

2023 — **ACKE Creative Studio · React Developer** (Ilijaš · contract)
Delivered a personalized React dashboard MVP for music producers in three months, covering the full product lifecycle.

2021 — 2023 — **Bloola GmbH & Co. KG · React Developer** (Gevelsberg, Germany · contract)
Agile development on projects for BMW and Deutsche Bundesbank: contract management, a drag-and-drop app builder, and course-discovery tooling on React + SharePoint.

2021 — **Solution404 · Software Developer** (Sarajevo · on-site)
Full-stack React work on MyLawyer; led the Mine Tracking app from conception to deployment.

STACK

`React / Next.js` `Vue 3` `TypeScript` `Material UI` `Tailwind CSS` `TanStack Query` `Storybook` `PHP (Laravel)` `Python (Flask)` `Node.js / Express` `GraphQL` `REST APIs` `MySQL` `PostgreSQL` `MongoDB` `SQLite` `Docker` `CI/CD` `Vercel` `Git`

EDUCATION · LANGUAGES

B.Sc. Computer Science, International Burch University, Sarajevo (2017 – 2023)

Bosnian native · English professional · German upper intermediate

SELECTED PROJECTS

Jul 2025 – present

LibLynx report builder · Lead Software Developer

Lead developer of the report-builder application inside LibLynx's analytics platform: drag-and-drop COUNTER reporting, saved/shared/template/comparison workflows, Storybook component system. React 19, TypeScript, Material UI, TanStack Query.

liblynx.com

2026 – present

DIN Solution · CTO & Head of Software Development

CTO & Head of Software Development of an international FinTech consulting firm (London, Luxembourg, US): technology direction, delivery behind the IT-solutions service line, the firm's web platform.

dinsolution.com

2025 – present

Neo Labs · Head of Communications & Software Innovation

One of four members of an EU AI-voice company; engineered the customer-facing Next.js platforms of Neo Care (daily AI calls for seniors) and Neo Therapy (structured support between therapy sessions).

neo-labs.ai

Oct 2024 – Mar 2025

Arkona + GumaMax · Senior Frontend Developer

Led end-to-end development of Arkona Technology's bilingual React website and built GumaMax, a multi-vendor tire-ordering dashboard.

arkonatechnology.com

2025

Nepa Invest · Web Engineering

Engineered the web presence of a real-estate developer: render galleries, video tours and lead-generation flows for three developments.

nepainvest.com

LAB & MORE

Sui NFT DApp (2024) — A live decentralized app on the Sui blockchain: wallet connection, on-chain NFT minting and leveling, SUI coin management. Next.js, TypeScript, Zustand.

GumaMax (2025) — Multi-vendor tire-ordering dashboard for Arkona Technology: catalog, vendor management and ordering workflows.

ProCredit internal tools (2024 – 2025) — HR dashboard, customer-referral system and ATM-feedback tooling for a bank. Vue, React, Flask, Laravel, MySQL. No UI shown.

Bloola CM & Bloola Factory (2022 – 2023) — Contract management as a Microsoft Teams app, and a no-code drag-and-drop builder for small web apps on Material UI + Java Spring.

BMW My Learning Finder (2023) — Course-discovery tooling for BMW's learning platform on React + SharePoint.
